

Driving Transformational Growth

in partnership with our management teams

Overview & Investment Strategy

We are a New York-based private equity firm that invests in technology and technology-enabled services companies serving government and enterprise end-markets. We partner with founders, entrepreneurs, and executives of middle-market businesses seeking a value-add partner that can help them drive accelerated growth and achieve operational excellence

We empower our executives to build better businesses by not only investing our capital, but also our time and expertise. We are patient investors and understand that long-term success is measured by outcomes, not by speed

While we are change agents, we rely on the foundations of our portfolio companies and seek to uphold the attributes that have enabled prior success. We take a partnership approach in supporting our portfolio companies achieve their growth potential without disrupting their core culture and values

TEAM & EXPERIENCE

19 team members
85+ years investing

CAPITAL STRUCTURE

Conservative capital structures that prioritize growth & innovation

GROWTH PROFILE

Compelling organic and inorganic growth potential

GEOGRAPHY

Headquarters and / or most employees based in North America

Value Creation Strategy

We believe that value creation is best achieved through revenue growth and margin enhancement driven by sound strategic initiatives and operational best practices, rather than financial engineering. For each investment, we take a long-term view toward value creation and work collaboratively with a company's management to develop a value creation plan – with both strategic and operational elements – that is tailored to the company's specific end-market, business model, and competitive position.

Our partnership approach begins with active, strategic involvement at the board level based on a tried-and-true operating framework:

BUILD

Investments to enhance corporate infrastructure, including talent, organizational design, and systems

IMPROVE

Business model and operational refinements to drive organic growth and achieve operational excellence

GROW

Drive revenue growth, expand TAM, and augment product portfolio via organic investments and M&A
